# Problem Statement

A NFT marketplace development project that is a unique and provide opportunity for individuals to show up and represent their collectibles to encourage effective digital asset management. Deploy a website for buy and sell of Nft's and the future of digital art.

# Proposed Solution

- In our website we can sell and buy NFT's through guided auction.
- It will give the best experience for a new user to learn about NFT's through videos, blogs, podcasts and interactive discussions.
- It will provide all information needed to know when and what to sell or buy and at what price.
- Provide future opportunity to make your own character and be part of metaverse.

# Scalability.

In future, we can add the feature of character development of your NFTs. Every person can use there character for trading or to enter the gaming world. To make NFTs a part of this investment world.

# Uniqueness

Our website is build on the top of blockchain technology to provide user to develop character of their NFTs and enter metaverse. To use these NFTs as an investment that will grow as time goes on.

Thank You
